REGISTRATION
www.ciil2013.fr

FEES
The registration fees are 160€ for students and postdocs and 400€ for all academic participants.

The registration fees will include lunch, coffee breaks and buffet dinner. The number of academic participants is limited to allow registration of up to 100 students and post-doctoral fellows in order to foster their interactions with lecturers.

Opening of registration:
March 22, 2013

Abstract Deadline:
May 31, 2013

Early On-line Registration Deadline:
May 31, 2013

Cancellation Deadline:
July 31, 2013

Letters of acceptance:
August 30, 2013

The meeting aims to bring together leading specialists in areas of allergy, microbial pathogenesis, immunology, cancerology, and metabolism to discuss the most cutting edge breakthroughs on the versatility of our innate immune system and on an adaptation mechanism through which the problem pathogen manages to evade host defense. The program is shaped in five sessions to encompass a broad range of topics highlighting how innate immunity contributes not only to discrimination of microorganisms and to maintenance of commensalism, but also to progression of common human illnesses with increasing socio-economic impacts, such as asthma, Crohn’s disease, metabolic disorder and colorectal cancer.

In 2013, we will celebrate the 150th anniversary of the birth of Albert Calmette, who dedicated his life against infectious diseases. At this occasion, the Center for Infection and Immunity of Lille will organize an international symposium on innate immunity at the Institut Pasteur de Lille, France from October 9-11, 2013. The theme of the symposium will be focused on “Revisiting paradigms in innate immunity”, offering the unique opportunity a forum for exchanging ideas between disparate research communities.

**CILIL 2013 INTERNATIONAL SCIENTIFIC ADVISORY COMMITTEE:**

- Lena ALEXPOULOU, PhD
- Hervé BLOTTIÈRE, PhD
- Ivo BONECA, PhD
- Mathias CHAMAILLARD, PhD
- Isabelle COUILLIN, PhD
- Marc LECUIT, MD PhD
- Camille LOCHT, PhD
- Virginie PETRILLI, PhD
- Philippe SANSONETTI, MD
- James Di SANTO, MD PhD
- Mustapha SI TAHAR, PhD

**Tuesday, October → 8th**

- **8:00 - 8:30** Registration Open
- **8:30-11:40** Plenary session: Discrimination of microorganisms – Chair: Lena Alexopoulou, PhD, Ivo G. Boneca, PhD
- **8:30-9:00** Revisiting Nod1 Signaling, Thomas Kufer, PhD, Universitätsklinikum Köln, Germany
- **9:00-9:30** Use of a vaccinia virus protein to discover a new pattern recognition receptor for innate immunity, Geoffrey Shith, PhD, University of Cambridge, UK
- **9:30-10:00** Tea/Coffee break
- **10:00-10:30** C-type lectin receptor signaling in innate immunity, Jürgen Ruland, PhD, Technische Universität München, Germany
- **10:30-11:00** Shigella strategies to circumvent the innate immune system responses, Maria-Lina Bernardini, PhD, University of Roma, Italy
- **11:00-11:30** Two selected short talks
- **11:30-12:00** Lunch break and recreation
- **13:10-14:15** Plenary session: Subversion of host defenses – Chair: Lena Alexopoulou, PhD, Ivo G. Boneca, PhD
- **14:00-14:15** Stress pathways promoting inflammation, Fabio Martín, PhD, University of Lausanne, Switzerland
- **14:15-15:00** The different tastes of flagellin in mucosa, Jean-Claude Sirard, PhD, Inserm, France
- **15:00-15:30** Tea/Coffee break
- **15:30-16:00** Roles of the canonical and non-canonical Aim2 inflammasomes during Francillosis tularaenosis infection, Thomas Henry, PhD, Inserm, France
- **16:00-16:30** Role of epithelial cells in the regulation of intestinal immune homeostasis and inflammation, Manolis Pasparakis, PhD, Universitätsklinikum Köln, Germany
- **16:30-17:10** Two selected short talks
- **17:20-18:00** Visit of the Museum at the Institut Pasteur de Lille
- **19:00-21:30** Happy hours, buffet dinner and posters session
